## Directors' Review

## Balancing, Modernization \& Replacement (BMR) and Digitization

BMR done in last couple of years has already started yielding operational efficiencies, resource conservations and enhanced productivity enabling the Company to better serve the customers' requirements. The Company is further upgrading the production facilities through recently initiated BMR projects by availing State Bank of Pakistan Temporary Economic Refinance (TERF) Ioan facility from different banks. Moreover, to take advantage of technological developments for quicker and precise analysis, there has been increased focus on digitization through end-to-end integration of different processes with ERP.

## Corporate Social Responsibility (CSR)

The Company's different CSR initiatives for education and welfare of surrounding communities continued during the period. Additionally in prevailing COVID-19 pandemic, Company is also providing assistance to the less privileged people in vicinity of the mills in the shape of food package and personal care products besides extending support to health care and schooling facilities in the area in coordination with local administration.

## Near Term Outlook

In line with the recent growth trend in large scale manufacturing, Market has been witnessing improved activity and improving demand for the Paper \& paperboard products in general and packing boards in particular. The improved demand is being met successfully by the company with the available range of well-developed and established products. This trend is expected to continue in ensuing quarter though there might be slight seasonal dip in sales volumes.

On the other side the most recent steep upward trend in prices of major raw materials (wood pulp and waste paper) is very challenging. Especially, Waste Paper prices, both imported as well as procured locally, have seen an unprecedented increase in the last few months. Management anticipates that this phenomenon of erratic price upsurge will stay for a while. Coal and RLNG prices are also on the rise. Management is cautiously reviewing the developing situation and to ensure sustainable performance, will continue with its strategy of volume maximization, which will get further support from completion of a few BMR projects recently. Adjustments in selling prices as per market conditions will be considered to ease pressure on margins on the backdrop of significant cost escalations coming from both raw materials and fuel prices.

## Acknowledgments

The Directors wish to acknowledge the devotion of the employees of all cadres and are appreciative of their dedication and commitment. They also extend heartfelt appreciation to Company's suppliers, customers and bankers for their continued confidence and support.
